

ellipse_item.EllipseItem.generate
_edges

line_item.LineItem.generate
_edges

rectangle_item.Rectangle
Item.generate_edges

ellipse_item.EllipseItem.get_path

```
graph LR; A["ellipse_item.EllipseItem.generate_edges"] --> D["ellipse_item.EllipseItem.get_path"]; B["line_item.LineItem.generate_edges"] --> D; C["rectangle_item.RectangleItem.generate_edges"] --> D;
```

The diagram illustrates a dependency or inheritance relationship. Three source boxes on the left, each containing a method name, have blue arrows pointing to a single target box on the right. The target box is shaded gray and contains the method name 'ellipse_item.EllipseItem.get_path'. The source boxes are white with black borders and contain the following text: 'ellipse_item.EllipseItem.generate_edges', 'line_item.LineItem.generate_edges', and 'rectangle_item.RectangleItem.generate_edges'.
